

10/813,616

IN THE TITLE:

Please amend the title of the application to read as: --**DRIVERLESS**
INTERFACING OF A REMOVABLE DEVICE WITH A DIGITAL PRODUCT--.

IN THE SPECIFICATION:

Please amend the following paragraph starting on page 1, line 8 of the specification as follows:

Many portable devices are now being manufactured with external memory slots to allow users to upgrade their devices with additional memory and/or software after purchase. The SD card is an excellent example of this technology, and slots capable of accepting SD cards are now found on many items of equipment including PDAs, mobile phones, audio players, digital cameras, camcorders and other consumer electronics products whether mobile or not. Other formats such as MMC, CompactFlash ~~CompactsFlash~~ and SmartMedia are similar in their capabilities.
